

A&L Healthcare Consultancy

Training Courses for Nursing Staff in Care Homes

These courses help staff to reduce GP call-outs, reduce calls to ambulance services and help nurses provide more services in-house and improve the quality care of residents whilst maintaining their safety

All courses include competencies which comply to the recommendations from the Francis report 2013 & can be used for Nurse Revalidation

Courses Include:

- Venepuncture
- Urinary Catheterisation – Male & Female
- Basic Clinical Assessment
- NEWS Scoring
- Syringe Driver (T34 McKinley)
- Verification of Expected Death
- Healthcare Assistant training
